AK011246 1364 bp mkNA linear HTG-19 JAN-2002 Mns musculus 10 days embryo whole body cDNA, R.KEN 1411 length enriched library, clone:2603017M22:relinoblastoma 1, 1411 lusert sequence. DEFINITION ACCESSION RESULT 1 AKU11246 VERSION KEYWORDS SOURCE LOCUS

Mus musculus (strain:05781/63) to days embryo cDNA to mkNA, clone\_lib:RIKEN tull-length enriched mouse cDNA library AKÖ11246 AKÜ11246.1 GI:12847243 HTC; CAP trapper.

clone:2600017M22. ORGANISM

Mammalia; Eutheria; Rodentia; Schuroquathi; Muridae; Murinae; Mus Eukaryota; Metazoa; Chordata: Craniata; Vertebrata, Enteleostomu; Mus musculus

 The library was prepared and sequenced in Mouse Genome Encyclopedia Project of Genome Exploration Research Group in Piken Genomic Sciences Center and Genome Science Leteratory in Piken Genomic Science Leteratory in Piken.

Division of Experimental Animal Research in Riken contributed to proper mouse tissues. First strand cDNA was primed with a primer proper mouse tissues. First strand cDNA was primed with a primer for Genomical Property of the Contributed to proper and subsequently enriched for full-length by cap-trapper. Second stand of the Mouse proper of the Mouse Proper of Confidence (5) sequence (5) sequence (5) with Abol and Ssti. Cloning sites, 5' end. Xbol; 3' end. Ssti.

Model-transcription lirst 45 summaries

Model-transcription by the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of the parameters of t

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distriction.

```
prepare mouse Lissues. First strand obna was primed with a primer of concaragoracycroproperties of the was propored by using trebalose thermo activated newther transcriptuse und subsequently unlithed for full length by cap trapper. Second and stand obna superpared with the primer adapter of sequence [5] darand obna was prepared with the primer adapter of sequence [5] with Xhol and Setl. Cloning sites, 5' end: Xhol? A end: Setl.

ACGTAR LINEAR EXT 14 ANG-2001
BYETERIA 30816_F1 313 (SYNORYM: hloc2) Homo sapiens cDNA clone
DKETERIA 109816_S1 mEMA Sequence.
 Mammalia; Entheria; Primates; Catarrhin; Hominidae; Homo.
(1958-8-17-72-7)
Poustka, Wellenreuther, R., Mewes, H.W., Well, B. and Wiemann, S.).
EST (Exists A. Wellenreuther, P. Mewes H.W., Well, B. and Wiemann, S.).
 Eukaryota Motagoa Chordata, Crasilata Vestelista; Eutoloegtomi
 This is the 5' sequence of the clone insert.
Clone Irom S. Wiemann, Molecular Genome Analysis, German Cancer Research Center (DRIZ), Email 3.WiemantGALL Feldelberg.do.
Sequenced by DRIZ (German Cancer Research Center, Section of the Heidelberg Cormang) within the SPNA symmetry or esertion of the

First need of the part of the page (Pharmacia) with a modified polylinker; ist strand cDNA was prepared from mammary quand lissue from a lactafing lemmale, and was then primed with a Not 1 - oligo(dd) primer, bouble stranded cDNA was ligated to Eco RI adaptors (Pharmacia), digested with Not 1 and cloned into the Not 1 and Eco RI sites of the modified pITTA vector. Library is normalized. Library was coinced by Benio Scares and M. Estima Bonaldo. **
 This clone is available royalty-tree through LLNL; contact the IMAGE Consortium (info@image.llnl.gov) for further information.

linear EST 29-APR-1999
 CDNA was
 polylinker; 1st strand cDNA was prepared from mammary gland tissue from a lactating temale, and was then primed with a Not 1 - oligo(dT) primer. Double stranded cDNA was ligated to Peo Pt adaptors (Pharmacia), digested with Not 1 and cloud into the Not 1 and Ecc Pt sites of the modified p1713 vector. Library is normalized. Library

 Protections of the part (Pharmacia) with a modified polylinker; 1st strand cDNA was prepared from mammary daland tissue from a lactating lemale, and was then primed with a Not I = Oilgo(dT) primer. Double-stranded cDNA was ligated to Eco RI adaptors (Pharmacia), digested with Not I and cloned into the Not I and Eco RI sites of the meditied pi7Ts vector. Library is normalized. Library was constructed by Bento Soares and M. Fatima Bonaldo. "

AL599633 605 bp mRNA linear EST 14-AUG-2001 DKEPP314P092 rl 313 (synchym: bloc2) Homo sapiens rDNA rlone DKEYP313P092 57, mRNA sequence.
 Am Klopferspitz 19a N 92152 Martinsried, Germany
This is the 5 sequence of the clone insert
Clone from S. Wiemann, Molecular Genome Analysis, German Cancer
Research Conter (DRE2); Email s.wiemannedkiz heidelberg.de;
sequenced by MMYZ (Biomedical Research Center at the Charite,
Herlin/Germany) within the Gena sequencing consortium of the German
 Homo sapiens
Eukaryota: Motazoa: Chordata; Craniata; Vortobrata; Euteleostomi;
 No.s1 sequence available.
This clone (DKE) TP692) is available at the ETP5 in Reflin Please contact the RZPF Pessourcentenny, Heubnerweg 6, 14059 Berlin-Charlottenburg, GHRMANY: Fmail: clonearzpd_dc_iccation/Qualifiers

 Seq primer: -28ml3 rev2 ET from Amersham
```

```
Apply Index 1 pt7t40-Pac (Pharmacia) with a meditied polytimker; ist strand cubw was prepared from mammary dand tissue from a lactating formacie, and was then primed with a Not 1 - Oilgo(dl) primer. Doubler-stranded cubw was liquated to Fee RI adaptors (Pharmacia), dispessed with Net 1 and cloned into the Not 1 and Eco RI sites of the medified pt7t3 vector. Library is normalized. Library was constructed by Netto Soares and M. Patima Honaldo. "178 c. 217 q. 261 t. Lothers."

polylinker; ist strand cDNA was prepared from mammary dated tissue from a lactaling townste, and was then primed with a Not 1 - oliqo(dl) primer. Double-stranded cDNA was ligated to Boo NI adaptors (Pharmacha), discisted with Nit I and cloned into the Not I and Eco RI sites of the modified pT7T3 vector. Library is negmalized. Library was constructed by Bento Soures and M. Falina Bonaldo. "

Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

 Marra, M., Hillier, L., Allen, M., Bowles, M., Dietrich, N., Dubuque, T., Gestel, S., Kucaba, T., Lacy, M., Le, M., Marthin, J., Morris, M., Schellenberg, K., Stepter, M., Ean, F., Hiderwood, K., Moore, H., Theising, H., Wylie, T., Lennon, G., Soares, B., Wilson, R., and
 Construction of PTTTP-Pay (Pharmaria) with a modified polylinker; ist strand cDNA was prepared from mammary polylinker; ist strand cDNA was prepared from mammary abundlessee from a lawtatina femile, and was then primed with a Not 1 - oligo(dT) primer. Double-stranded cDNA was ligated to Eco RI adapters (Pharmacia), digested with Not 1 and cloned into the Not 1 and Eco Ri sites of the modified pTTT3 vector. Library is normalized. Library was constructed by Bento Scares and M. Pai ma Bonaldo. " 178 c 217 q 261 t lothers

And Land Composition of Land Charactal alth a modified polylinker; ist strand cDNA was prepared from mammory dand tissue from a lactualida femble, and was then primed with a Not I - oligo(dl) primer. Double-stranded cinA was ligated to Eco R: adaptors (Pharmacia), digested with Not I and cloned into the Not I and Eco R: sites of the modified pTTT3 vector. Library is normalized. Library was constructed by Bento Soares and M. Fating Bonaldo. "a 172 c. 204 q. 251 t. 2 others
This clone is available regalty free through LLNL, , contact the IMAGE Consortium (info@image.llnL.gov) for further information.
